

Surely you don't support the limiting of satellite radio broadcasts??!!???What's next??? Forbiding a person to listen to a radio station that's more than 50 miles away, for fear that they might offer better advertisements... Geesh!!!

I didn't serve my country to 8 years just to come back to the civilian world and see a government agency limiting the ability of a productive, law abiding company!! Free speech is free speech!! Traffic and weather IS NOT offensive to anyone.. Focus on that!! Don't fall for the lobbying of the radio broadcasters!! Satellite radio is progress!! Don't inhibit that!!!!

I URGE you to reject the NAB's Petition #04-160

With concern,
Josh Lopez
Marshall, TX
